OBJECTIVE

Ongoing software engineering student with passion in developing software. Seeking for an internship to apply skills gained from hackathon projects to real-world problems. Experienced in working individual and with a team across multiple projects.

EDUCATIONAL BACKGROUND

Universiti Putra Malaysia (UPM), Selangor (Oct 2023–July 2027)

Bachelor of Software Engineering (Honours)

Current CGPA: 3.96

Universiti Teknologi Mara (UiTM Dengkil), Selangor (Aug 2022–June 2023)

Foundation in Engineering

CGPA: 4.00

ACHIEVEMENTS

Dean's List Award (achieved more than 3.75 GPA) (2024, 2025)

Achieved in B.Sc. Software Engineering (Semester 1, 2, and 3).

Vice Chancellor's Award (achieved 4.00 GPA) (2023, 2025)

Achieved in Foundation in Engineering and B.Sc. Software Engineering (Semester 4).

Convergence Innovation Competition (CIC) Asia – Runner Up (December 2025)

Developed ChiliCare, an AI-powered agriculture solution for chili farmers with pest detection and smart irrigation.

Cursor X Anthropic Hackathon Malaysia – Participant (December 2025)

Built an AI fashion recommendation system that suggests outfits based on user skin tone and styles.

UNIMAS Mobile App Competition – 4th Place (December 2025)

Developing a reporting management platform with AI-powered road defect detection.

CodeNecton MMU – Participant**(September 2025)**

Built an AI-powered application aimed at supporting students' mental health.

Great Malaysia AI Hackathon – Participant**(September 2025)**

Create an AI legal assistant designed to simplify legal understanding with document summarisation and guided queries.

FoSEAL Hackathon – 2nd Runner Up**(June 2025)**

Developed a smart agriculture app for maize farmers featuring soil monitoring and AI-powered pest detection.

PayNet Hackathon – Semi-Finalist**(June 2025)**

Prototyped a fintech payment solution focusing on seamless digital transactions.

FCSIT Hackathon – Top 5**(July 2025)**

Designed a mobile app to help chili farmers improve productivity through digital tools and monitoring.

SKILLS

Programming: Java, C, SQL (MySQL), Dart, HTML, CSS, Javascript

Frameworks: Laravel, Flutter, React, Node JS, Next JS

Tools: GitHub, VS Code, Figma, Android Studio, Firebase, Vercel, Supabase

Language: Bahasa Malaysia (Native), English (Intermediate), Arabic (Beginner)
